

blo.kart® bungee cord-end clamp fitting instructions

1. Open-up the retainer loops with some needle-nose pliers (or similar).

6. The bungee cord-end clamp should look like this.

2. Thread the 150mm length of 3mm bungee through the loops

7. The bungee can be doubled-up to secure the batten.

3. Thread the other end of the bungee through the other loop as pictured.

8. Alternatively, the batten can be secured with just one loop of the bungee as pictured.

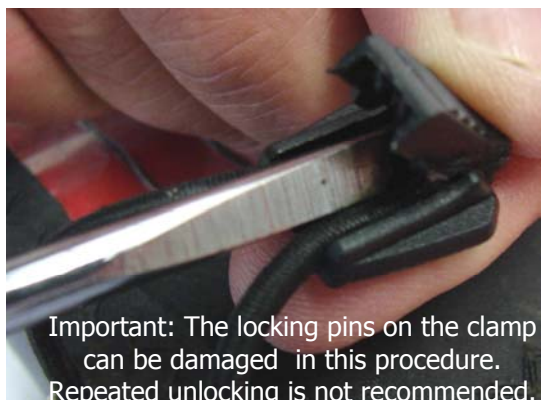

4. Insert both bungee ends into the small end of the bungee cord-end clamp.

9. To adjust the length/tension twist open with a small flat screw driver.

5. Close the clamp and press firmly ensuring both sides click into place locking it closed.

10. Once open, the bungee length can be cut to length and procedure 4 & 5 can be repeated.

Important: The locking pins on the clamp can be damaged in this procedure. Repeated unlocking is not recommended.
